Statements and Declarations

Acknowledgements

OpenAI ChatGPT was used during manuscript preparation to assist with background research, language and structural refinement, and the development of representative architecture visualisations. The authors independently developed the proposed architecture and arguments, verified the cited sources and technical content, and reviewed and approved the final manuscript. Generative AI was not used to generate research data or empirical results.

Author Contributions

Vishal Thakur and Mukesh Singh contributed to the conception and development of the architecture presented in this article, manuscript preparation, and review of the final manuscript.
